Business Analyst Intern
Code Icons Technology, [Pune,India]
[Nov 2021] - [May 2022]

- **Requirements Gathering:** Assist in gathering, documenting, and clarifying requirements from various stakeholders, such as clients, users, and project managers. This involves conducting interviews, surveys, and workshops to understand business needs.
- **Documentation:** Help in documenting gathered requirements, business processes, and system functionalities. This documentation serves as a reference for the project team throughout the development lifecycle.
- **Data Analysis:** Assist in analyzing data to identify trends, patterns, and insights that can inform decision-making. This could involve using tools like Excel, SQL, or specialized data analysis software.
- **Project Management Support:** Contribute to project management activities by assisting in tracking tasks, milestones, and project timelines. This might involve using project management tools like JIRA or Trello.
- **Stakeholder Engagement:** Collaborate with various stakeholders, including clients, users, developers, and testers, to ensure a common understanding of requirements and project goals.
- **Problem Solving:** Help in identifying issues and challenges that may arise during project implementation and contribute to finding solutions to overcome them.
